

ADOCIA
innovation for regenerative medicine

**ADOCIA, Drug Delivery Company for Biologics, specialized in Regenerative Medicine,
is recruiting for its Analytical Chemistry Department in Lyon (France):**

A PhD in Analytical Chemistry (CA/BAL)

Your mission will be to design, develop and certify new analytical tools for pharmaceutical formulations of biologics and innovative polymers for tissue regeneration.

In an environment of a multidisciplinary team of 50 people, you will collaborate with chemists, Physical Chemists, Biochemists and Biologists. You will access to all current analytical tools inside or outside the company. You will conduct the stability studies of our products.

You will manage a team of highly skilled technicians.

With a PhD in Analytical Chemistry, you possess the following skills:

- ✓ Expertise of analytical tools (HPLC, GPC, SEC, EC, RMN...)
- ✓ Knowledge of hydrosoluble polymers and proteins
- ✓ Expertise of physical chemical tools appreciated (ITC, DLS, SLS, Surface Tension, Rheology, electron microscopy...)
- ✓ Expertise of protein analysis appreciated
- ✓ Rigorous methodology
- ✓ Respect of Quality of Pharmaceutical Industry
- ✓ Fluent in English or French
- ✓ Good relationships and team spirit

Enthusiastic about Science and Innovation, you are motivated to work in a challenging and promising field.

Adocia promotes the excellence in order to be a key partner of large pharmaceutical companies for innovative treatments for regenerative medicine.
