

**ADOCIA, Drug Delivery Company for Biologics, specialized in Regenerative Medicine,  
is recruiting for its Biology Department in Lyon (France):**

**A PhD in Biology or Biochemistry (CB/MGA)**

Your mission will be to analyze, test *in vitro* and develop innovative formulations of biologics and innovative polymers for tissue regeneration.

Within a multidisciplinary team of 50 people, you will develop *in vitro* experiments to compare biological activities.

You will interact with the Physical Chemists to look for correlations between *in vivo* results and critical physical-chemical parameters in order to optimize our products.

You will interact with preclinical and clinical teams to analyze the *in vivo* results and propose models to explain the biological activities of our products.

You will manage a team of highly skilled technicians.

With a PhD in Biology or Biochemistry, you possess the following skills:

- ✓ Knowledge of protein/protein interactions
- ✓ Knowledge of cell culture
- ✓ Expertise of protein analysis
- ✓ Knowledge of standard analytical tools
- ✓ Rigorous methodology
- ✓ Respect of Quality of Pharmaceutical Industry
- ✓ Fluent in English or French
- ✓ Good computer skills
- ✓ Good relationships and team spirit

Enthusiastic about Science and Innovation, you are motivated to work in a challenging and promising field.

Adocia promotes the excellence in order to be a key partner of large pharmaceutical companies for innovative treatments for regenerative medicine.
