

## PRESS RELEASE

### **Adocia announces the suspension and the implementation of a liquidity agreement**

**Lyon, France, April 23, 2013** - Adocia (NYSE Euronext Paris : FR0011184241 - ADOC), whose shares are traded on the regulated market of NYSE Euronext in Paris, announces that it has suspended the liquidity agreement signed on March 12, 2012 with BIL Finance (formerly Dexia Securities France).

As of April 23, 2013, the following assets appeared on the liquidity account:

- 27,330 shares of Adocia and
- 748,411.58 euros in cash.

From 24 April 2013 and, until the renewal of the authorization that will be submitted to shareholders at the General Meeting of June 18, Gérard Soula, shareholder and CEO of Adocia, commissioned BIL Finance to implement a liquidity contract that complies with the code of ethics established by the AMAFI and approved by a decision of the AMF dated March 21, 2011.

The following assets have been allocated to the liquidity contract:

- 10,000 shares of Adocia and
- 30,000 euros in cash.

## About Adocia:

### ***"Innovative medicine for everyone, everywhere"***

Adocia is a biotech company specialized in the development of best-in-class drugs from the innovative formulation of certain already-approved therapeutic proteins.

Adocia is specialized in insulin therapy and the treatment of the diabetic foot, one of the main complications of diabetes. Worldwide, more than 366 million individuals are currently suffering from diabetes (with a forecast of 552 million individuals by 2030, i.e. a 51% increase, reaching 70% in emerging countries). 15% of these patients will develop a foot ulcer during their lifetime. The markets targeted by Adocia represent more than USD 20 billion (US D17 billion for insulin therapy and USD 3 billion for diabetic foot ulcer healing).

Through its BioChaperone® state-of-the-art technological platform, Adocia intends to enhance the effectiveness and safety of therapeutic proteins and their ease of use for patients, with the aim of making these medicines accessible to the broadest public.

Adocia successfully completed two phases I and II studies on the formulation of a fast-acting human insulin and obtained promising phase I/II results on a diabetic foot ulcer-healing product. Adocia also confirmed the value of its technology for the formulation of a fast-acting insulin analog by signing an exclusive worldwide license agreement with a major pharmaceutical company. Furthermore, Adocia is developing a unique combination of fast-acting insulin and slow-acting insulin, for an optimal insulin therapy with one single product.

### ***To be a global leader for the formulation of therapeutic proteins***

Based on its experience and recognized know-how, Adocia has extended its activities to the formulation of monoclonal antibodies, which are gold standard molecules for the treatment of numerous chronic pathologies (oncology, inflammation, etc.). In this field, Adocia is engaged in collaborative programs with two major pharmaceutical companies.

Adocia's therapeutic innovations aim at bringing solutions to a profoundly changing global pharmaceutical and economic context, characterized in particular by the increased prevalence and impact of the targeted pathologies, population growth and ageing, the need to control public health expenditures and increasing demand from emerging countries.

Adocia is listed on the regulated market of NYSE Euronext in Paris (ISIN: FR0011184241, mnemo / Reuters / Bloomberg: ADOC, ADOC.PA, ADOC.FP) and its share included in the Next Biotech index.
