

Adocia to Participate in Upcoming Investor Conferences

Lyon, France, November 10, 2016 – Adocia (Euronext Paris: FR0011184241 – ADOC), a clinical stage biopharmaceutical company focused on diabetes treatment with innovative formulations of approved proteins, today announced that Dr. Gérard Soula, the Company’s Chairman and Chief Executive Officer, will be participating in two upcoming investor conferences. The details for both conferences are provided below.

Jefferies 2016 Global Healthcare Conference

Date: November 16 – 17, 2016

Location: The Waldorf Hilton Hotel, London

Presentation Date and Time: November 16, 2016 at 3:20 pm (GMT)

During this presentation, Dr. Soula has been invited to provide an overview of the Company’s business strategy and recent developments.

Oppenheimer 2016 Life Sciences Summit

Date: November 29, 2016

Location: Sofitel Hotel, New York City

The Summit’s meeting format will feature Dr. Soula and Mr. Steve Daly, Adocia US General Manager, participating in one-on-one meetings with investors.

About ADOCIA

Adocia is a clinical-stage biotechnology company that specializes in the development of innovative formulations of already-approved therapeutic proteins. Adocia’s insulin formulation portfolio, featuring four clinical-stage products and one preclinical product, is among the largest and most differentiated in the industry.

The proprietary BioChaperone® technological platform is designed to enhance the effectiveness and/or safety of therapeutic proteins while making them easier for patients to use. Adocia customizes BioChaperone to each protein for a given application in order to address specific patient needs.

Adocia’s clinical pipeline includes four novel insulin formulations for the treatment of diabetes: two ultra-rapid formulations of insulin analogs (BioChaperone Lispro U100 and U200), a rapid-acting formulation of human insulin (HinsBet U100) and a combination of basal insulin glargine and rapid-acting insulin lispro (BioChaperone Combo). Adocia is also developing an aqueous formulation of human glucagon (BioChaperone Human Glucagon), two combinations of insulin glargine with GLP-1s (BioChaperone Glargine Dulaglutide and BioChaperone Glargine Liraglutide) and a concentrated, rapid-acting formulation of human insulin (HinsBet U500), all of which are in

preclinical development.

In December 2014, Adocia signed a partnership with Eli Lilly for the development and commercialization of the BioChaperone Lispro projects.

Adocia aims to deliver "Innovative medicine for everyone, everywhere."
